FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Re: *Dobson Cellular Systems, Inc. E911 Quarterly Report –
CC Docket No. 94-102*

Dear Ms. Dortch:

Dobson Cellular Systems, Inc. and its subsidiaries, by its attorneys, hereby submit the attached Quarterly Report on their progress toward and compliance with the terms and conditions of the *Order to Stay* and the Commission's E911 rules.¹

If there are any questions regarding this matter, please contact the undersigned.

Sincerely,

WILKINSON BARKER KNAUER, LLP

By: Lee J. Rosen

E911 Status – Quarterly Report

CC Docket No. 94-102

May 1, 2003

Summary of Report

Pursuant to the *Order to Stay*,¹ Dobson Cellular Systems, Inc.,² as a Tier II carrier, provides in this Quarterly Report (“Report”) information on all pending requests for Phase I and Phase II services received by DCS, including: the entity requesting service; the date the request was received;³ and the status of the request. For Phase I requests that have been pending for over six months or for which the March 1, 2003 Phase II deployment has passed, DCS has also included the projected deployment date (if available), a brief description of the reasons for the delay, and steps it has taken to resolve the issues causing the delay. Detailed information regarding the requests is contained in the attached table.

Phase I Service

DCS has received 70 requests for Phase I services and has activated service in 65 of these jurisdictions. DCS has worked diligently with its third-party location solution vendor, Intrado, as well as the public safety community, in coordinating Phase I deployment. The company remains committed to working with its vendors, the PSAPs, and state and local governments, in order to deploy Phase I services in these jurisdictions as soon as possible.

Phase II Service

A. Deployment Preparation

As discussed in its waiver petition, DCS is a mid-sized carrier servicing predominantly rural and suburban markets in 19 states. The company relies primarily upon a TDMA-based network of base stations and switching equipment. As a result of the lack of commercial availability of compliant handset-based Phase II location solutions for TDMA carriers, the company has taken steps to prepare to deploy a network-based solution.

DCS’s network consists of approximately 15 Mobile Switching Centers, a majority of which utilize equipment manufactured by Nortel Networks (“Nortel”), the rest utilizing some Lucent Technologies (“Lucent”) TDMA network equipment. DCS has worked with these equipment vendors to prepare for Phase II deployment, as all switch upgrades necessary to supply Phase II services were completed by Lucent by August, 2002 and by Nortel by June, 2002.

In addition, DCS has executed an exclusive contract with Grayson Wireless to provide the PDE equipment necessary to deploy its Phase II network-based location solution. The vendor has contracted to provide compliant Phase II services in Erie County, PA; Genesee County, NY; Cattaraugus County, NY; Chautauqua County, NY; and Austin County, TX as discussed below. In fact, DCS hopes to deploy Phase II services to 100% of the area in Erie

¹ See *Revision of the Commission’s Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, CC Docket No. 94-102, Order to Stay, 17 FCC Rcd 14841 (2002) (“*Order to Stay*”).

² The instant Report is filed on behalf of Dobson Cellular Systems, Inc. and its subsidiaries (collectively “DCS”).

³ As indicated in the table, the provided “request date” indicates the date the PSAP/requesting entity sent its request to DCS. This date may not correspond with the date the PSAP’s/requesting entity’s request was “valid” per Section 20.18(j) of the rules.

County, PA; Genesee County, NY; and Cattaraugus County, NY. DCS is currently deploying Phase II services to these jurisdictions in accordance with mutually agreed to timetables which have been negotiated or are currently under discussion with PSAPs.

B. Phase II Requests

DCS has received requests for Phase II service from the following five jurisdictions: Erie County, PA; Genesee County, NY; Cattaraugus County, NY; Chautauqua County, NY; and Austin County, TX. On October 3, 2002, the company sent correspondence to the contacts for Erie, Genesee and Cattaraugus Counties, stating that it is tentatively considering each request "valid" solely for purposes of good faith and intends to provide Phase II services. The status of these requests is detailed in the attachment. For each active request, DCS is proceeding with deployment, and proceeding in good faith even for PSAPs who have not yet provided *Richardson* documentation.

To ensure that it may properly prioritize its E911-designated resources, DCS has requested each of these PSAPs to provide documentation pursuant to the *Richardson* criteria.⁴ DCS has received a response to its request from these PSAPs and is proceeding in good faith and has signed a contract with Grayson to provide Phase II capabilities in Erie, Cattaraugus, Genesee and Austin Counties. Furthermore, in Chautauqua County, DCS has also requested that the PSAP provide documentation pursuant to the *Richardson* criteria⁵, and was notified by the LEC that the county is not ready to accept Phase II at this time. Finally, on February 11, 2003 DCS sent correspondence to Austin County requesting documentation pursuant to the *Richardson* criteria. DCS has received a reply from the county and considers Austin County's request valid.

C. Deployment Issues

In discussions with Grayson Wireless, however, DCS has learned that leasing and zoning issues may affect DCS' ability to meet the March 1, 2003 deployment deadline in some markets. Specifically, in order to meet the Commission's network-based accuracy requirements, Grayson Wireless has informed the company that it will need to install Angle-of-Arrival ("AOA") antennas at certain cell sites in addition to the Time Difference of Arrival equipment that will be installed in individual cell sites. DCS has also been informed that installing AOA antennas may require tower modifications, lease modifications, and zoning approvals – any of which present the potential for delay.

DCS brought similar matters to the Commission's attention in its original waiver request.⁶ Accordingly, if necessary, DCS may avail itself of further waiver procedures to account for the potential market-specific shortcomings a network-based solution in its rural markets may present. The Commission has indicated that it will consider such requests.⁷

As required by the *Order to Stay*, a copy of this report is being filed with the Chief of the Enforcement Bureau, the Chief of the Wireless Telecommunications Bureau, and the Executive Directors and Counsels of APCO, NENA, and NANSA.
